

Research Analysis Technician

Description:

Isomark, LLC has a student position available beginning as soon as possible. The main focus of this position will be to collect samples from participating UW athletes and assist with analyzing breath samples on Isomark's device, as well as other assigned data analysis projects. Student should have an interest in sports nutrition, research and/or data analysis. The student will be required to maintain human subjects research and HIPAA training. This position is approximated to be 15-20 hours a week depending on student availability. Student must be available on Wednesdays from 8-10:30 am (other hours are flexible). Pay is \$10.00/hour.

Requirements:

- Student with a nutrition/research/medical education focus (e.g. pre-med, nutrition, biomedical engineering, etc.)
- Data entry, working with data and data manipulation experience
- High attention to detail
- Demonstrated ability to maintain focus and concentration for data integrity.

How to apply

Send resume and cover letter to research@isomark.com or by mail to:

Isomark, LLC
